SmartPCS Taps V-COMM Experience with Network Expansion

Dalton, Georgia (June 3, 2008) - V-COMM has been contracted by SmartPCS to assist with the creation of their wireless network. By tapping V-COMM's experience in RF and Network engineering, SmartPCS will be able to offer expanded coverage and impressive wireless service to its customers. V-COMM has aided numerous small and rural carriers to construct, improve and build-out their networks in the past 12 years. V-COMM's "Virtual Engineering Program" is designed to provide large market RF and Network Engineering experience to small and rural wireless carriers. Smart PCS operates the BTAs covering Dalton, Georgia to Cleveland, Tennessee.

"Managing overhead is a big issue for a small carrier. V-COMM affords us a virtual RF department and Network development team. They are a group of seasoned engineers using the latest tools who are dedicated to our network. My success is their success," says Anthony Ortolani, CEO of SmartPCS.

“V-COMM is pleased to provide this service to SmartPCS. We understand the value of expert engineering and its impact on the bottom line of small and rural wireless carriers,” notes Dominic VILLECCO, President of V-COMM, L.L.C.

V-COMM is a leading provider of integrated network engineering, radio frequency engineering and business services. It delivers the needed expertise and cost-effective solutions to wireless/wired operators and governmental agencies. Company executives are much sought-after expert witnesses providing testimony on telecommunications issues in local, regional, national and international venues. V-COMM has a growing staff of over 50 engineers and professionals with offices in Cranbury, NJ and Blue Bell, PA. For more information, visit us on the World Wide Web at www.vcomm-eng.com.
