V-COMM Presents FCC with Results of H-Block Study

Cranbury, NJ, October 3, 2005 – V-COMM, a leading New Jersey based telecommunications engineering firm, recently presented the FCC with the results and analysis of testing and their research regarding the H-Block’s impact on PCS handset. The study was commissioned by Verizon Wireless.

“As wireless technologies continue to expand, and new operating bands and modes of operation are deployed, it is imperative that the operators and the FCC continue this type of dialog to ensure new initiatives can be met while maintaining high levels of reliability for the existing service,” said Dominic C. Vilecco, President and CEO of V-COMM.

V-COMM provides integrated network engineering, radio frequency engineering and business services for the telecommunications industry, public safety operators and corporate enterprise, delivering needed expertise and cost effective solutions. Company executives are much sought-after expert witnesses providing testimony on telecommunications issues in local, regional, national and international venues. V-

COMM has a growing staff of over 50 engineers and professionals with offices in Cranbury, NJ and Blue Bell, PA. For more information, visit us on the World Wide Web at www.vcomm-eng.com.
