V-COMM REPORTS DYNAMIC GROWTH FOR FIRST YEAR

*V-COMM Brings A New Breed Of Engineering Excellence
to the Wireless World*

Warminster, Pa., October 17, 1996 -- Dominic C. Villecco, President and founder of V-COMM, L.L.C., reported dynamic growth for V-COMM'S first year. The V-COMM wireless engineering team of professionals completed projects for PriCellular in their Midwestern markets encompassing a review of their Network and RF Engineering, and technical operations. V-COMM is currently working with Omnipoint Communications, Inc. on their northeast MTAs and BTAs providing network engineering and project management. PCS ONE, the C-Band license winner in Lancaster, Pennsylvania, contracted with V-COMM to execute their strategic and project management objectives including capital planning and contract negotiation as well as RF and Network Engineering required for the development of this centrally located Pennsylvania market. Similar services are also being provided by V-COMM to several paging operators, competitive access providers, nationwide microwave licensees as well as international projects in Latin America.

At the helm of V-COMM is Dominic Villecco. He leads a team of engineers with, in-depth experience in telecommunications engineering that is firmly rooted in the realities and challenges of the wireless service providers. Dominic was formerly Vice President of Wireless Engineering at Comcast Corporation where he was responsible for the operation, development and analysis of requirements for Cellular GSM, PCN and ESMR systems. Dominic named David K. Stern formerly Director of Strategic Projects and Wireless System Engineering for Comcast Cellular Communications as Vice President of V-COMM.

David is utilizing his diverse engineering experience both in wireless data and the new digital technologies (CDMA, TDMA and NAMPS) to help oversee the extensive V-Comm. operation. "David's expertise and superior management skills are a perfect complement to the V-Comm commitment to provide an unparalleled premier service to our clients" stated Dominic Villecco. Together, Dominic and David are chartering a course of long-term growth for *V-COMM* that is founded upon the principal of delivering a new breed of engineering excellence to the wireless world. V-COMM is based in Warminster, Pennsylvania with a branch office in Egg Harbor Township, New Jersey.
