V-COMM Promotes Sean Haynberg to Engineering Manager

Cranbury, NJ (Dec 17, 1997) – V-COMM, L.L.C., pace setting telecommunications engineering company, announces the promotion of Sean Haynberg to the position of engineering manager. His responsibilities include managing domestic and international RF system design projects, coordination of vendor activities and preparation of bid proposals and response for new business opportunities.

Haynberg is V-COMM's resident expert on RF safety issues and the implementation of OET-65 programs for FCC regulated carriers. He is based in V-COMM's Cranbury, NJ office.

Haynberg is very enthusiastic about his new position, "It is remarkable working with V-COMM. They are a highly talented group of individuals that set the standards for other consulting services."

"Sean's leadership and dedication have earned him praise and appreciation from both customers and V-COMM", says Dominic Villecco, V-COMM's Founder and President. "We are fortunate to have him with us."

Haynberg joined V-COMM in December 1996 from Bell Atlantic Nynex Mobile. As a senior engineer for RF field support he was responsible for evaluation new technologies and providing support for the development and implementation of first office applications (FOA), including CDMA, CDPD and RF Fingerprinting Technology. Beyond this, Haynberg has provided RF engineering guidelines and recommendations to support the development and integration of new equipment and technologies, including indoor wireless PBX/office systems, phased/narrow-array antenna systems and cell site co-locations and acceptance procedures. He also coordinated the support of the engineering tools for regional network engineers used to improve the design and performance of cell sites, microcells and switches.

V-COMM provides unparalleled services in telecommunications engineering that are firmly rooted in the realities and challenges of today's business climate. V-COMM's staff of engineering

that are firmly rooted in the realities and challenges of today's business climate. V-COMM's staff of engineering are experienced in personal communications services, cellular, Specialized Mobile Radio, enhanced SMR, paging, Wireless data, microwave, fiber optic cable systems, signaling system 7 and local exchange switching networks. V-COMM has office in Warminster, PA and Cranbury, NJ and provides services to both domestic and international markets. For additional information, Please call Dominic at 609-655-1200.
