## **V-COMM NAMES COOVER DIRECTOR OF ENGINEERING FOR EXPANDED NETWORK SERVICES GROUP**

**CRANBURY, N.J., Feb. 8, 1999** - V-COMM L.L.C. announces the promotion of Donald S. Coover to Director of Engineering in charge of the company's Network Services Group. He is responsible for creating and managing the expanded products and services offered by this group.

"The growing demand for enhanced services in the communications industry raises the bar for network engineering support," said Dominic Villecco, president of V-COMM. "We are meeting the challenge by creating the Network Services Group. Don and his team are focused on the development and implementation of the increasingly complex networks of wireless, wired and Integrated Communications Providers."

"The Network Services Group offers a wealth of knowledge and experience in all network elements and environments," said Coover. "I congratulate V-COMM for the having the foresight to build this staff from the ground up - creating a team of professionals trained to meet the need for hybrid engineering as new and existing technologies converge."

V-COMM is a leading provider of quality engineering and engineering related services to the worldwide telecommunications industry. V-COMM's engineering staff is experienced in designing, implementing and optimizing Local and Long Distance Exchange Switching, SS7, IP Telephony, Fiber Optic, Microwave, PCS, Cellular, ESMR, Paging and Wireless Data networks. V-COMM has offices in Cranbury, New Jersey and Warminster, Pennsylvania and provides services to both the domestic and international telecommunications markets. For additional information please visit V-COMM's web site at [www.vcomm-eng.com](http://www.vcomm-eng.com), or call Ken Baranowski on 609-655-1200.
