V-COMM Co-Op Students Receive Unisys Award

Philadelphia, PA, (June 14, 2001) – V-COMM co-op students Stephen Basuki and Chun Leung, along with teammates Derek Lim, Luis Munoz and Yevgeny Shubinsky, received the Unisys Award from Drexel university for excellence of design for their senior project. The team was selected from among thirty –one entries to receive the award. The team created a PCS-CDMA network drive test system with the guidance of V-COMM president and Drexel alum, Dominic Villecco. Mr. Villecco supervised the team’s proposal, introduced the team to necessary contacts and provide equipment for the project.

“The team members are a driven group of students that handled this challenging project successfully,” said Dominic. “as a Drexel alum, I know the importance of private companies supporting students with the resources required for advanced projects such as this. I am glad that V-COMM could fill that role.”

“This was a demanding process that covered three terms,” said Basuki. “It was exciting to see all of our hard work come together and even more thrilling to be rewarded for the final product.”

The team developed a data collection system for radio frequency network drive testing. It typically takes two days to complete drive test- one day to gather information and one to process the data. The team developed a cost-effective system with real-time data transfer to minimize processing time. This data collections system included software package, a PCS-CDMA handset and a chip set for data collection and transfer. The final version of the project also contained the template of a network dive test system with the flexibility to incorporate new technologies as they become available.

V-COMM, a leading provider of integrate network engineering, radio frequency engineering and businesses service, delivers needed expertise and cost-effective solutions for wired and wireless operators and vendors. Company executives are sought-after

expert witnesses providing testimony on telecommunications issues in local, regional and national venues. V-COMM has a growing staff of over 50 engineers and professionals in its Warminster, PA and Cranbury, NJ offices. For more information, visit us on the World Wide Web www.vcomm-eng.com.
