V-COMM President Leads Educational Session On In-Building Applications For Wireless Carriers

Myrtle Beach, SC (October, 2010) - Dominic Villecco, President and Founder of V-COMM, L.L.C., lead an important educational session at this year's Business and Technical Conference for the Rural Cellular Association. This presentation had speakers from several companies, explaining the ins and outs of In-building Applications, and how they can differentiate a carrier's service. The session explored how to address different types of venues, by utilizing various technologies including indoor Distributed Antenna Systems (DAS), Bi-Directional Amplifiers (BDAs) and Femto cell technology. Attendees received knowledge of industry best practices, and an understanding of which technologies are best suited to match the specific needs of their business.

V-COMM is a leading provider of integrated network engineering, radio frequency engineering, and business services. V-COMM delivers the needed expertise and cost-effective solutions to governmental agencies, and wired and wireless operators. Company executives are much sought-after expert witnesses providing testimony on telecommunications issues in local, regional, national, and international venues. V-COMM has a growing staff of nearly 30 engineers and professionals with offices in Cranbury, NJ and Blue Bell, PA. For more information, visit us on the World Wide Web at www.vcomm-eng.com.
