**V-COMM TO LEAD PANEL OF EXPERTS
For the Closing Session at the Rural Cellular Association's
Annual Convention**

Las Vegas, NV (April, 2010) – V-COMM President, Dominic Villecco, leads a panel of industry experts on the hot button topic of LTE. Representatives from five organizations team up at the RCA Convention to bring carriers the answers they have been looking for. This closing session is a follow-up to the 700 MHz/LTE session presented during the October 2009 RCA Business and Technical Conference. “Where the Future Is: LTE Panel Discussion”, will give the audience a better knowledge of the current state of LTE initiatives and roadmap for future advancements. Discussions will revolve around: RCA member carrier initiatives, market trial discussions, chipset/handset update, and OEM perspectives.

“This panel is intended to be a continuing series and part of the framework on topics of great member interest,” says Dominic Villecco. “You can expect to gain insights regarding the current state of industry developments in the movement to 4G services.”

V-COMM is a leading consultant for integrated network engineering services to telecom operators, municipalities, and corporate enterprises throughout the U.S. We are recognized for our custom engineering design solutions and vendor neutral approach in developing high performance wired and wireless networks. For more information, visit us on the World Wide Web at www.vcomm-eng.com.
